

MMD Series

This serie incorporates double movable table and fixed head system, adopting the fixed ring format.

The constructive system used on this model makes it to be a machine specially designed for aluminum and other non-ferrous resistant materials working, where it is necessary to use big dimensions and heavy tools.

The fixed head system allows us to configurate a multiple aggregate and heavy spindle, without the speed of movement being reduced.

Having a long stroke in "Z" axis allows us to machining curved parts, and can install 4 or 5 axis spindles. The adaptation of different CNC configurations allows us to manage from 3 to 12 axis.

Machine of great robustness that allows us the machining of all type of materials. This robustness offers us a high precision and a high quality of the finished pieces.

	3015D	4016D	5016D
X	2 x 1500	2 x 2000	2 x 2500
Y	1500	1600	1600
Z	500/800	500/800	500/800

Other measures available on demand

MMD Series

Head composition.

- Vertical milling spindle HS/655 of 18 Kw. HSK/63 – 5 axis
- Vertical milling spindle HS/300C de 13Kw. HSK/63 – 5 axis
- Rotary tool change's storage with 10/12/16 Pos. Multispindle option with one storage for each head.
- Vacuum pumps of 250m³
- MasterCAM
- CNC Siemens 840 DSL.

Other configuration is possible on demand
