

# Alufast/S Series

This series incorporates the fixed table and movable head system, adopting the swan-neck format.

The subsection is made by pneumatic clamps installed on the consoles, which can be placed even automatically or manually.

Machines can realize displacements of up to 90 mts./min.

Those universal machining centers are destined to aluminum profiles or similar machining.

La composició del capçal de treball, es pot configurar d'acord amb les necessitats de producció.

	4025	7025
X	4000	7000
Y	250	250
Z	250	250

Other measures available on demand

# Alufast/S Series

## Head composition.

- Vertical milling spindle type ES 779, 10kw – 4 axis
- Tool change's rotary storage with 12 Pos.
- Clamps-holder consoles with progressive tightening.
- TopSolid
- CNC Siemens 840 DSL.

Other configuration is possible on demand.
