

SJN/D Series

This series integrates the fix table and mobile bridge system supported by two raceways with the Gantry system.

The construction system used in this model makes this machine especially designed for working on voluminous workpieces.

With a longer course for the "Z" axis, it enables us to machining curved items, with the possibility of installing heads with 4 or 5 axis.

This fully cased machine offers the option of soundproofing.

The robustness of the structure allows high speeds of movement of the axes and excellent finishes.

	1600
X	2 x 1600
Y	2 x 1350
Z	400

Other measures available on demand

SJN/D Series

Head composition.

- Vertical milling spindle ES 779 of 18 Kw. HSK/63–5 axis
- Vertical milling spindle ES 369 of 13 Kw. HSK/63–5 axis
- Tool change's storage with 12 Pos.
- Rotary table with pneumatic clamps. Double table with pallet change system.
- TopSolid
- CNC Siemens 840 DSL.

Other configuration is possible on demand.
